- b. ☒ This application was filed on or after June 30, 2003. Accordingly, copies of cited U.S. patents and patent application publications therefore are not included. Copies of foreign patent documents and non-patent literature are included.

- c. ☐ Some or all of the documents listed on the PTO-1449 are not enclosed because they were cited in the International Search Report and copies should already be in the PTO file. If copies are needed, please contact the undersigned.

III. CONCISE EXPLANATION OF THE RELEVANCE  
(check at least one box)

- a. ☒ **DOCUMENTS IN THE ENGLISH LANGUAGE**

The patents, publications, or other information listed on the attached PTO 1449 are in the English language and therefore, do not require a statement of relevancy.

- b. ☒ **DOCUMENTS NOT IN THE ENGLISH LANGUAGE**

A concise explanation of the relevance of all patents, publications, or other information listed that is not in the English language is as follows:

WO 03/055043- Two detection brushes 14 are side-by-side and contact the same contact piece. This publication does not involve a climate control system.

JP2001238424- US application US2002163259, in the English language, corresponds to this publication. This publication was cited in an International search report for WO 03/055043.

JP2000321008- This publication was cited in an International search report for WO 03/055043. From the drawings it does not appear to involve a climate control system or encoder segments.

JP9023617- This publication was cited in an International search report for WO 03/055043. From the drawings, it appears to relate to use of a power commutator of a motor. It does not appear to involve a climate control system or encoder segments as disclosed in this application.

JP9191621- This publication was cited in an International search report for WO 03/055043. From the drawings, it appears to relate to use of power commutators of a motor. It does not appear to involve a climate control system or encoder

segments as disclosed in this application. It appears from the drawings, although the undersigned cannot speak Japanese, that a motor is driven from two separate commutators feeding outer and inner coils.

JP3106864- This publication was cited in an International search report for WO 03/055043.

JP2000023424- This publication was cited in an International search report for WO 03/055043. From the drawings, it appears to relate to a preassembled power commutator of a motor. It does not appear to involve a climate control system or encoder segments. It is thought that this publication relates to US patent 5,446,328, although these two publications do not appear to be identical.

JP8146031- This publication was cited in an International search report for WO 03/055043.

c. ☐ **ENGLISH LANGUAGE SEARCH REPORT**

An English language version of the search report or action that indicates the degree of relevance found by the foreign office is attached, thereby satisfying the requirement for a concise explanation. See MPEP 609(III)(A)(3).
